

Shivansh Mishra

Mumbai, India | +91 9820689183 | Shivansh54mishra@gmail.com | [LinkedIn](#) | [GitHub](#)

TECHNICAL SKILLS

Languages: Java, Python, C, JavaScript, SQL, HTML/CSS

Frameworks & Libraries: Spring Boot, Spring Security, Spring Data JPA, Hibernate, React.js

Web Technologies & APIs: RESTful APIs, JSON, JWT Authentication **Databases:** MySQL, PostgreSQL, MongoDB

Tools & Platforms: Git, GitHub, Docker, Postman, IntelliJ IDEA, VS Code

CS Fundamentals: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks, Microservices, Distributed Systems, Event-Driven Architecture

EDUCATION

K.J. Somaiya Institute of Technology

Mumbai, India

B.Tech in Information Technology (CGPA: 8.72/10)

Expected Graduation: May 2028

R.K. Talreja College

Ulhasnagar, India

Class XII (HSC) – Score: 89.33% (College Topper, Principal's Award)

2024

EXPERIENCE

Open Source Contributor

Oct 2026

codecentric (Spring Boot Admin)

Remote

- Submitted 4 Pull Requests to the globally adopted **spring-boot-admin** repository, successfully merging PR #5738.
- Engineered a new **max-log-size-per-aggregate** property for **in-memory** and **Hazelcast event stores**, resolving active issue #5604.
- Developed **auto-configuration coverage**, updated official documentation, and ensured code quality by passing focused **Maven tests** (9/9), **Checkstyle**, and **Spring Java Format** validations.

Web Development Intern

Aug 2025 – Sep 2025

Skill Craft Technology

Remote

- Developed 4 responsive web projects, including a To-Do application, a dynamic landing page, and a web-based game using **React.js**, **JavaScript**, **HTML**, and **CSS**, while integrating **RESTful APIs**.
- Collaborated with teammates to troubleshoot frontend issues and managed project source code using **Git** and **GitHub**, while actively learning and adopting **Agile** and **Scrum** development methodologies.

PROJECTS

ShortUrl – Distributed URL Shortening Service | *Java, Spring Boot, React.js, MySQL, Docker, Microservices*

GitHub

- Designed and developed a large-scale, highly available service-level application using **Java** and **Spring Boot** with independent **API Gateways** and **microservices**, ensuring fault isolation and mission-critical reliability.
- Implemented a **Base-62 encoding** algorithm supporting **56.8B+** unique **URL mappings** with collision detection, demonstrating strong algorithm design and problem-solving skills.
- Built secure **JWT-based authentication** using **Spring Security** and centralized routing via **Spring Cloud Gateway**, applying clean code practices and object-oriented design.
- Configured **Netflix Eureka** for dynamic service discovery and load balancing across microservices; containerized all services using **Docker** for consistent build, deployment, and operations.
- Wrote comprehensive unit tests using **JUnit** and validated **RESTful Web Service** API contracts via **Postman** to ensure reliability across authentication, URL generation, and redirection services.
- Debugged and troubleshoot latency bottlenecks in redirect workflows; implemented asynchronous click tracking, achieving measured **sub-15ms p95 response times**.

Track2Act – Logistics Tracking & Fleet Management System | *Java, Spring Boot, React.js, MySQL*

GitHub

- Developed a multi-tiered application with **Role-Based Access Control** for 4 distinct user roles (Admin, Officer, Driver, Public), implementing **state-machine-driven** shipment workflows to deliver end-to-end visibility across 10+ operational processes.
- Designed and implemented **RESTful web service APIs** for fleet management, driver assignment, and shipment tracking; elicited and validated requirements by iterating on system architecture.
- Integrated **JWT-based authentication** and authorization via **Spring Security** to enforce secure access management across all service-level API endpoints.
- Optimized **MySQL** database schema and SQL queries for data scalability; debugged and resolved query performance issues to support real-time operational monitoring.

HACKATHONS

Bharatiya Antariksh Hackathon (ISRO) | *Idea Submission* | Verify

2026

- Conceptualized 'UrbanCool AI', a **geospatial decision-support** platform utilizing **physics-informed machine learning** and **Earth Observation datasets** to mitigate Urban Heat Island (UHI) effects.

AI for Bharat Hackathon (AWS) | *Qualified Prototype* | Verify

June 2026

- Demonstrated technical execution using **generative AI tools** on **Amazon Web Services (AWS)** to solve real-world challenges for India.
- Collaborated in Team CodeArc to develop the MVCVS project, integrating **AI-driven solutions** to address localized problems.

Dreamflow Buildathon 2025 | *App Developer* | Verify

2025

- Developed 'StudySphere', a **social productivity super-app** designed to eliminate digital isolation and context-switching fatigue utilizing **live state synchronization**, **accountability rooms**, and a **peer-to-peer bounty system**.

Adobe University Hackathon | *Round 3 Qualifier* | Verify

Aug 2026

- Advanced through aptitude and case study rounds to reach Round 3, ranking among the **top 200** out of hundreds of thousands of global participants.

ET-AI Hackathon 2026 | *Semi-Finalist* | Verify

May 2026

- Emerged as a Semi-Finalist in the ET-AI Hackathon, demonstrating strong **problem-solving skills** and commitment to building meaningful **AI solutions**.

ACHIEVEMENTS & CERTIFICATIONS

Algorithmic Problem-Solving: Solved **202+** DSA problems on LeetCode; completed Alpha (DSA with Java) certification from Apna College.

Technical Certifications: Cleared **HackerRank Software Engineer Intern** and **Java (Basic)** certification tests; IIT Bombay Spoken Tutorial **Java Training** (Score: 72.50%).

Job Simulations: Completed **J.P. Morgan Software Engineering** (Dec 2025) and **Deloitte Technology** (June 2025) Job Simulations.

Domain Certifications: **Databricks Accredited Generative AI Fundamentals** (Sept 2026); **HP LIFE AI for Beginners** (Feb 2025);

NPTEL German-I (Jan-Apr 2026).
